

PERCo Case studies

Belmont Village is one of the largest nursing home networks in Mexico and the United States.

31

branches in the
US and Mexico

20

years of experience

4000

residents

4000

employees

Belmont Village offers assistance and care in daily living activities for elderly people with memory loss, Alzheimer's and other types of dementia by implementing programs developed in assistance with the US research universities.

“Belmont Village always offers exceptional services and top-notch care, making us an industry leader”

— Patricia G. Will , Belmont Village founder and president

Belmont Village offers 11 stories of senior housing, an eight-story Hyatt Hotel above the senior housing, ABC medical center, and Conde de Valencia Ophthalmological Institute.

After more than 20 years of developing and operating senior living communities, Belmont Village has won awards from universities and associations like:

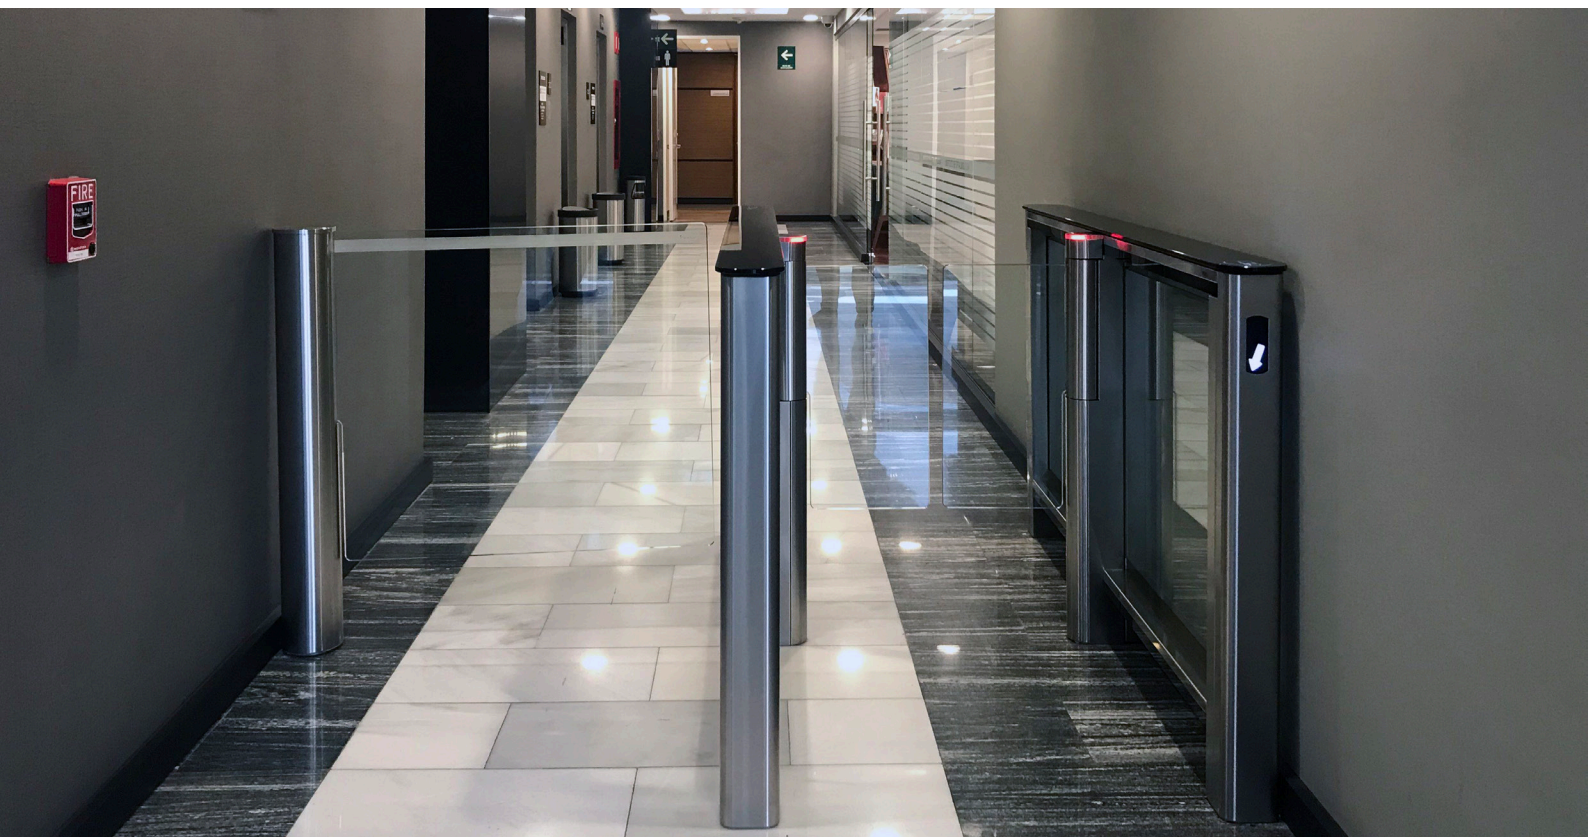

ST-01 speed gates were chosen for this project along with WMD-06 motorized swing gates. The equipment is installed at the entrance and in between the Belmont Village and ABC medical center buildings.

When receiving a signal from an ACS, the glass panels open providing a contactless passage which was the decisive factor in choosing the equipment.

Swing panels of increased width ensure comfortable passage of residents with reduced mobility. Contactless cards are used to access the area.
