Moscow Kremlin, New York's Grand Central Station, the Burj Khalifa tower in Dubai and La Scala Opera House in Milan are equipped with Trane energy-efficient heating, ventilating and air conditioning systems.

"Our company creates comfortable, sustainable and efficient environments for people around the world"

— Michael Lamach, Ingersoll Rand CEO

Trane specialists designed and installed Europe's largest cooling system with 480 kilometers of water cooling pipes in the 50.45 km. long Channel Tunnel beneath the English Channel that links the United Kingdom and France.

RTD-16.2 full height turnstiles with RTC-16 canopies are installed at the Société Trane plant located in Charmes, Vosges department, France.

RTD-16.2 full height turnstile is designed for facilities with high requirements for maximum safety and security. It can operate in gateway mode.

RTC-16 canopy provides additional protection from downfalls and prevents climbing over the turnstile.

Employees use contactless cards to access the territory.

Project: Trane plant, France

France

Charmes

Installer:  ITCotation <http://www.itcotation.com/>

Equipment: 3 RTD-16.2 full height rotor turnstiles
with RTC-16 protective canopies
