

## Fisht Stadium

Fisht stadium is located in Sochi Olympic Park and was built specifically for the 2014 Winter Olympics. Fisht is considered to be one of the most modern and large-scale sports facilities in Russia.

In 2018, the stadium hosted matches of the FIFA World Cup tournament. FIFA experts carefully checked the stadiums that hosted the championship and were satisfied with the level of security at the Fisht stadium. During the matches, the site was monitored by means of more than 2,000 CCTV cameras.

There are 98 RTD-15 full-height turnstiles installed at the entrance to the stadium, which completely cover the passageways and can operate in the lock-chamber mode.

Corrosion resistance and improved rigidity of the welded structure ensure a long working lifespan even under conditions of aggressive marine climate and were important factors for turnstiles selection.

RTD-15 turnstiles provide a high throughput of 20 people per minute, which allows you to prevent queuing when organizing access control for mass events.

## Site: Fisht Stadium

## Equipment: RTD-15 Full height rotor turnstiles

PERCo - security equipment manufacturer

30 years in the security market

State-of-the-art manufacturing facilities

Export to 90 countries worldwide

Warranty period - 5 years

Technical support and training

Warehouses in Russia and EU  
(The Netherlands and Estonia)
